**Special Session Call for Papers
International Symposium on Computer, Consumer and
Control, 2014**

Special Session organizer: Prof. Chou-Chen Wang

Session name: *System Integration and Its Application*

Introduction/ Call for papers

Technologies in the research field of System Integration and Its Application have made great progress in recent decades, and system integration has now become a popular term in the field of electrical/information engineering. Many researchers in system integration have made great efforts to develop methodologies for intelligent system, theories, methods, and applications of quality metrics, etc., and these research results have had great influence in the greater field of system integration and its application.

With the advancement of computer hardware providing more powerful computing environments, system integration researchers have been able to challenge solving larger and more complex problems. Driven by such motivation, the innovative methodologies of system integration technologies are proposed not only in area of engineering but also in new paradigms in consumer electronics. In this Special Section, we are particularly interested in research papers depicting integrated systems and their various real applications such as smart antenna system, wireless communication system, mobile multimedia system, embedded robot system, and smart control system. Prospective authors are invited to submit original papers to the Special Session.

Indicative Topics/Areas

The topics of interest include, but are not limited to

- Smart Antenna System and Its Application
- Wireless Communication System and Its Application

- Mobile Multimedia System and Its Application
- Embedded Robot System and Its Application
- Smart Control System and Its Application
- Other Integration System and Its Applications

Prospective contributors are invited to submit their paper to Prof. Wang by email chchwang@isu.edu.tw. All presented papers will be published in the Proceedings and the excellent papers will be recommended for publication in the special issue of SCI Journal.
